

**nobilia 2014 Collection. The Next Step.**

## **SENSYS as Standard at no Surcharge nobilia's next step toward even more perfection**

**Verl. After the launch of the new drawer system Profi+ last year, the kitchen manufacturer set out with an unswerving focus on further improving the quality and perfection of its product. One highlight of the new features this year is the conversion of the entire product range over to the SENSYS hinge with integrated cushioning.**

The standardised introduction of SENSYS means even more quality and perfection in the hinge technology from nobilia kitchens. The multi award-winning SENSYS hinge with integrated cushioning from Hettich represents the latest generation of hinge technology on the market. Beginning with the changeover to the new collection, nobilia will be equipping all kitchens, from entry level to the high end segment, with SENSYS as standard at no surcharge. Thus, the company provides innovative technology with excellent value for money. Thanks to SENSYS, nobilia raises its collection both qualitatively and technologically to an even higher standard of quality. All customers benefit automatically from this advancement.

SENSYS combines consistent design with convenience that speaks to the senses. The Silent System cushioning is invisibly integrated in the hinge. An innovation, which meets the highest standards in convenience and functionality. This includes the cushioned, automatic closing of furniture doors at the extraordinary angle of 35°. SENSYS always closes reliably and maintains the unique large self-closing angle while providing cushioning for doors of varying sizes and weights.

SENSYS ensures smooth, even closure within a broad temperature range of +5°C to +40°C as well as at a relative humidity of 90 percent. With a service life of at least 80,000 performance cycles, SENSYS stands for quality and reliability.

The SENSYS design is modern and sleek. Discreet lines from the hinge cup to the mounting plates ensure a modern hinge design. All edges and radii coordinate perfectly with one another for a harmonious overall look. The Silent System cushioning is as invisible as the release tab. SENSYS has already been distinguished with the "red dot design award 2008" and the "iF product design award 2009" for its excellent design.

SENSYS can be assembled or disassembled quickly and easily without tools. To unlock, simply press lightly with your fingers on the concealed release tab. Then, in one smooth, ergonomic movement the hinge is released from the release tab and hinge arm.
